

ACOPOS motor-integrated drive system

ACOPOS remote distributed drive system

open SAFETY

Features	Motor-mounted servo drives, maximum power with minimum space requirements, integrated SafeMOTION functions with ultrafast response time, Integrated STO according to Cat. 4 / PL e / SIL3 for uncontrolled and safe stops
Cooling types / Construction	Self-cooling Optional fan unit
Rated power [kW]	1.3 to 2.3
Available options	Electronic options POWERLINK Trigger, 24 VDC out) Oil seal Motor holding brake Smooth shaft or shaft with keyway
Size	3 4 5
Rated torque [Nm]	1.17 5 7.1 1.52 5.1 8.4 5.2 10
Stall torque [Nm]	2.4 5.7 8 2.86 6.7 10 7.7 12
Peak torque [Nm]	6.12 20.5 21.6 9.81 27.4 36.5 31.1 46.6
Stall current [A _{RMS}]	2.22 2.57 3.61 2.62 3.02 4.51 3.49 5.42
Peak current [A _{RMS}]	5.67 14.46 14.9 9 19.29 21 21
Moment of inertia [kgcm ²]	0.95 2.73 6.04 1.2 3.58 8.19 4.39 10

Features	IP65 inverter modules, Uncontrolled and safe stops integrated, Integrated connections for motor holding brake and temperature sensor
Mounting options	Self-cooling / Cold plate
Power mains connection	750 VDC
Installed load	1.5/4/8 kW
24 VDC power supply	External via hybrid cable
Motor connector	Continuous power 1.5/4/8 kW Continuous current 4.5/8/8/18 A _{RMS} Peak current 13.5/24.5/45 A _{RMS} Short circuit / Ground fault protection
24 VDC internal	-
I/O connections	2x trigger inputs, 1x 24 V output 2x enable inputs per module (Cat. 4 / PL e EN ISO 13849-1, SIL 3 EN 62061 / IEC 61508)
Additional connections	Temperature sensors Motor holding brake
Optional plug-in modules	-
Slots for plug-in modules	1
Variations	EnDat 2.1 encoder HIPERFACE encoder SinCos encoder
Dimensions [mm]	Width: 137 Height: 287.2 Depth: 131

B&R drives - Driving innovation

Complete solution

B&R's holistic approach to Generic Motion Control combines single-axis positioning, gear, cam profile, CNC and robotic functions. Complemented by network-based safety technology with fast response times, this makes entirely new machine concepts possible.

Perfect modularity

Ready-made technology functions for tension control, registration mark control and cross cutters allow machine manufacturers to concentrate on their core areas of expertise. Advanced software and hardware architectures support modular machine concepts perfectly.

Drives for every application

B&R drive technology includes compact drives (ACOPOSmicro), single-axis systems (ACOPOS), multi-axis systems (ACOPOSmulti) and distributed drive systems with IP65 protection (ACOPOSremote) for especially harsh environmental conditions.

ACOPOS highlights

- Power range from 500 W to 64 kW
- Compact and scalable
- Integrated technology functions
- PLCopen motion function blocks
- Integrated safety technology

ACOPOSmulti highlights

- Energy regeneration and savings
- Power range from 1.4 to 120 kW
- Compact and scalable
- Modular cooling design
- Integrated technology functions
- PLCopen motion function blocks
- Integrated safety technology and SafeMC

ACOPOSremote highlights

- Seamless integration in the ACOPOSmulti drive system
- High continuous power up to 4 kW
- Integrated connections for I/O nodes
- Flexible topology (tree or daisy chain)

Integrated automation
Global presence
Solid partnership
