Calibration  
Services

# Calibration Services Overview

Calibration is generally provided as part of a scheduled plan but can be delivered on demand, when required. Our qualified Instrumentation and Control Technicians take measurement readings from your instrumentation and compare them to our certified standards, making sure each item is reading correctly. Our calibrations are all traceable to National Standards and all Bonner test equipment is ISO 17025 certified and our calibrations comply with HPR, FDA, HACCP and BRC regulations.

We provide process and laboratory calibrations and our calibration service team are located nationwide to provide your site with quick availability to fit your schedules. We also provide client calibrations in our modern, dedicated Instrument Workshop in Ballymount, Dublin. We can return calibrations sent to Bonner in as little as 48 hours.

If the readings are outside specified tolerances, our technicians adjust the unit under test accordingly. They then issue a calibration certificate using our ProCalV5 calibration management software which captures the calibration results. Recommended maintenance procedures or actions to address under-performing or out-of-tolerance equipment are also recorded in an electronic service report. The report is linked through ProCalV5 directly to the instrument under test for any necessary future analysis.

We add value to our service by providing experienced Instrumentation and Control Technicians. This means we can offer advice and fault-finding expertise on site, so you can get the most out of your calibrations.

All our calibration records are stored electronically, our audited systems then produce a secure PDF of your certificate and can send directly to you or host in our secure client portal. Our client portal is accessible by invite only to your company's data and gives full reporting on each Instruments Calibration Certificate, Current Instrument List, Calibrations by Day and Service Reports. The portal will always keep a history of your certificates meaning they can be found quickly during an audit.

Our Calibrations Certificates are available the next morning after calibration completion.

Other Services...

- Maintenance
- Temperature Mapping
- Instrument Analysis
- Procurement & Supply
- Control & Automation Solutions

## CALIBRATION SERVICE LEVELS

Calibration Service	Basic	Standard	Premium
Qualified Instrument Technician	✓	✓	✓
Next Day Certificates	✓	✓	✓
Certified Test Instruments	✓	✓	✓
Copy of Traceable Certificate	✓	✓	✓
Digital Certificate	✓	✓	✓
Client Portal	✓	✓	✓
Site Instrument List	✓	✓	✓
Single, 3 or 5 Point, Loop & Simulation Calibration	✓	✓	✓
Dedicated Lead Technician	✗	✓	✓
No Cost Site Induction & Site Familiarisation	✗	✓	✓
Instrument/Loop Record Report	✗	✓	✓
Next Day Emergency Availability	✗	✓	✓
Basic Instrument Analysis	✗	✗	✓
Criticality Assessment	✗	✗	✓
Regulatory Pre-Audit Check	✗	✗	✓
Reverse Traceability	✗	✗	✓
Individual or Loop Instrument Scorecard	✗	✗	✓
Site Wide Scorecard	✗	✗	✓

We calibrate...

- Temperature
- Pressure
- Flow
- Humidity
- Scales & Balances
- pH
- Conductivity
- Air Flow
- Chlorine
- Current
- Density
- Dimensional
- Distance
- Electrical
- Moisture
- Resistance
- RPM
- Salt
- Time
- Viscosity
- Test Weights
